

The LAMDA Journey

At Centre Pointe Dance Studio teach accredited LAMDA (London Academy of Music & Dramatic Art) courses in Performing, Verse and Prose, Shakespeare and Musical Theatre to students 8-years-old and above. Our LAMDA courses include examinations so your child can earn recognized certifications for their future career and gain vital life long skills!

We need to give our children every advantage possible in auditions, job interviews, and other opportunities they pursue. What better way to set them up for success than to encourage a love for public speaking? The knowledge that they will never stumble over their own words at an important presentation because they had formal training will be invaluable.

The LAMDA Performing courses develop the skills necessary for students to confidently and competently convey a text dramatically to an audience on a core level, but also allows students to develop team work and delegation skills, a belief in themselves, their ability to perform and their ability to undertake new challenges easily.

Our Musical Theatre course nurtures musical talent, song presentation and dramatic skills, and we also encourage our students to complete independent research, which is excellent practice for future school and university coursework.

The Verse & Prose and Shakespeare courses provide students with an appreciation of language and characterization as they engage with texts orally while improving their diction, voice and posture. The Shakespeare course allows the student to develop interpretive skills in bringing Shakespeare's language to life for a modern audience.

Last term, our students achieved outstanding results; 67 Distinctions, 14 Merits, and two of our students were awarded 100%! We are incredibly proud of every student that has worked through LAMDA certification with us, and we look forward to helping your child go on the same journey soon! We have classes running Monday – Saturday, so be sure to book a trial class, call us or email us to discuss getting your child started in a LAMDA course soon.
